

Welcome Friends and Customers,

Welcome to the 13th Annual SEGA Bull sale here at the home place. 30 years ago we bought our first registered Gelbvieh mother cows, and it sure was a great decision! We truly believe there is not a better cow on the planet than a Gelbvieh or Balancer - they just flat know how to get it done. Here at SEGA, we truly believe that cattle must fit the environment that they must run in and we've worked hard for years to build a herd of mamas that fit this tough western country that we all run in. We don't believe in buying into fads or using the next Great Bull of the month. It seems as though the Seedstock Industry has become more and more driven by these type of number driven types of thinking. We are proud of our cowherd and they sure work their hearts out to get the job done for us!

These cattle are summered on native hard grass and wintered and calved out in the cornstalks and after feed. The heifers are treated in the same way as the running age cows calving out in the open - we feel that this gets them accustomed to getting the job done with minimum maintenance. We truly believe in developing these bulls on a slow, steady pace. They are fed a high roughage ration consisting of ground alfalfa, ground wheat hay, silage, protein supplement along with a small amount of flaked corn. We feel that this makes for bulls with longevity and hardiness.

Once again, this year, we will have Jon Flack auction the bulls off. He does a great job and we are happy to have him back.

As always, we stand behind these bulls and want them to go out and do a great job for you! Any questions can be directed to Gail or me. If we don't have an answer for you, we will do our best to get one.

Regards, Steve and Gail

Steve and Gail Fiolkoski – SEGA Gelbvieh

SEGA GELBIEH AND BALANCER

Production Sale

March 7th, 2020

Viewing starts at 10:30 a.m.

Lunch at High Noon

- **Health:** The cattle have had all their vaccinations and will be semen tested and available for interstate shipment within the U.S.

- **Terms:** Cash or cashable check on sale day unless other arrangements have been made with us.

- **Delivery:** We will deliver your purchases at no cost to you within 250 miles. We will keep the bulls until April 1st, at no charge. Feed cost after April 1st will be \$2.50/per day. We will deliver the bulls to you at an agreed upon time. The bulls will be cared for as if they were ours, but we cannot guarantee against sickness, injury, or death.

- **Transfers:** Cattle with registration papers will be transferred to the new owner.

- **Guarantee:** All bulls in the sale are guaranteed to be breeders if not allowed to run with the herd until at least 14 months of age, and if not subjected to gross negligence by the purchaser.

- **Liability:** You attend the sale at your own risk and we will not be responsible for any accidents or injuries that might occur.

Directions to the Farm:

- From Ault, Colorado: 2 miles north on Highway 85, then 1/8 mile west on County Road 86. From Pierce, Colorado: 2 miles south on Highway 85 then 1/8 mile west on County Road 86.

In case of bad weather, please call ahead.

**Homozygous Black data will be on
supplement sheet.**

Wow this is a really attractive purebred bull from Tom and Sammie! The Rommel bull came out of the Bolton herd in Montana and he sure is doing a fine job at Lakeview Farms.

49-53

This group of commercial heifer calves are right out of our replacement pen.

“For the past ten years, we have purchased SEGA balancer bulls. We have been very happy with the quality and the customer service that Steve and Gail provide. They produce bulls that have good temperament and are easy to handle, and they stand behind their stock 100%. In the past, we have had SEGA bulls and bulls from other producers on our commercial cow herd at the same time and you could always pick out the calves from the balancers! They are stocky, hardy and really pack on the pounds!. We now run strictly SEGA balancer bulls on our commercial herd and we would highly recommend them to anyone that wants to add weight and thickness to their calf crop.”

Entitled “Advice” to buyer
of the high selling bull!

Bull Selection Guide:

Use this guide to help you decide what type of bull may work best with your current cowherd makeup. An “X” marks our suggested bull type.

My Cowherd Makeup	Purebred or High Percentage Balancer	Mid-Range Balancer	Low Percentage Balancer
Mostly British-based (Angus, Red Angus, or Hereford)	X	X	
Equal blend of Continental and British Breeds	X	X	X
High percentage Continental (Gelbvieh, Limousin, Charolais, or Simmental)		X	X

Purebred Gelbvieh or High Percentage Balancer is 63% Gelbvieh or higher. These bulls will add muscle and red meat yield along with great maternal values.

Mid-Range Balancers are 38% to 63% Gelbvieh. Use these bulls to maintain feedlot performance and carcass value, without losing the maternal edge.

Low Percentage Balancer is 38% Gelbvieh or less. Use these bulls to add carcass value and calving ease.

**Don’t forget to register for
the \$100 gift certificate, from
J9 Insurance, for a 10X
American Felt Hat

Herd Health Program:

Birth	7-Way and Inforce
Branding	Bovishield Gold 5, 7-Way
Pre-Weaning	Bovishield Gold 5, One Shot
Weaning	Bovishield Gold-5, 7-Way with Somnus, Multimin 90
At Semen Test	BoviShield Gold VL5
Pre-Breeding	BoviShield Gold VL5

Parasites controlled with Ivermectin pour-on.

Care of your yearling bulls:

We would encourage you to take a little extra special care of your investment(s). Yearling bulls are still growing and we all expect a lot out of them. Limit the breeding season and number of cows that they will have to service. Do not turn young bulls out in the same pasture with mature bulls. A yearling in good condition can be expected to service 15-25 cows in his first season, but he will need to be brought in early and given a little extra care after all that work. Yearlings will start losing their teeth at 15 to 18 months of age and need a little **TLC** if you expect them to grow and develop to their full potential. A little extra care up front will make your purchases last a lot longer and also make for healthier, better bulls down the trail!

When you first turn your bulls out, watch them and make sure that they are getting the job at hand done. Also, if they start getting a little run down rest them or give them a little extra energy, it will pay dividends in the long run!

Thanks

We owe a big THANKS to our consulting veterinarian Shawn Bott DVM for keeping the herd healthy. To Lori and Lyndsey Stevens for all their help putting the sale book together and for the wonderful video presentation.
