

## SEGA GELBVIEH AND BALANCER

Production Sale

March 14th, 2026

Viewing starts at 10:30 a.m.

Lunch at High Noon

Welcome to our 19<sup>th</sup> annual bull sale here at the home place. Every year this event seems to sneak up on all of us around here. We truly appreciate both our long-time customers and also all the new folks we have got to know over the years!

This is a good set of bulls and heifers that we have confidence in and feel they will go out and sire the market topping kind of feeders and also make extremely fertile, maternal replacement females. There will be three good bulls in the offering from our friends Ryan and Nikki at Gallatin Gelbvieh.

Most of you already know and understand that we develop these cattle on a slow and steady program based on a diet of ground alfalfa hay, corn silage, a good protein supplement and a very small amount of flaked corn. We feel this is in the best interest of both the cattle and our customers to create seedstock that are not fat but fit and ready to go out and get their job done.

Feel free to call us with any questions on the offering, and as always we truly look forward to seeing you all on March 14<sup>th</sup>.

Rest assured that we stand behind these cattle and are here to assist you in any way we can.

Regards, Steve and Gail

**Steve and Gail Fiolkoski – SEGA Gelbvieh**

Pierce, Colorado 80650

Gail's cell: 970-590-4862

Steve's cell: 970-381-0600

Jon Flack – Auctioneer – 970-590-5654

Joe Winslow – Phone Bids - 970-301-6119

- **Health:** The cattle have had all their vaccinations and will be semen tested and available for interstate shipment within the U.S.

- **Terms:** Cash or cashable check on sale day unless other arrangements have been made with us.

- **Delivery:** We will deliver your purchases at no cost to you within 250 miles. We will keep the bulls until April 1<sup>st</sup>, at no charge. Feed cost after April 1<sup>st</sup> will be \$2.50/per day. We will deliver the bulls to you at an agreed upon time. The bulls will be cared for as if they were ours, but we cannot guarantee against sickness, injury, or death.

- **Transfers:** Cattle with registration papers will be transferred to the new owner.

- **Guarantee:** All bulls in the sale are guaranteed to be breeders if not allowed to run with the herd until at least 14 months of age, and if not subjected to gross negligence by the purchaser.

- **Liability:** You attend the sale at your own risk and we will not be responsible for any accidents or injuries that might occur.

### **Directions to the Farm:**

- From Ault, Colorado: 2 miles north on Highway 85, then 1/8 mile west on County Road 86. From Pierce, Colorado: 2 miles south on Highway 85 then 1/8 mile west on County Road 86.

**In case of bad weather, please call ahead.**

32-36

**Group of five Black Commercial Heifer Calves - right out of our replacement pen.**

## Bull Selection Guide:

Use this guide to help you decide what type of bull may work best with your current cowherd makeup. An "X" marks our suggested bull type.

My Cowherd Makeup	Purebred or High Percentage Balancer	Mid-Range Balancer	Low Percentage Balancer
Mostly British-based (Angus, Red Angus, or Hereford)	X	X	
Equal blend of Continental and British Breeds	X	X	X
High percentage Continental (Gelbvieh, Limousin, Charolais, or Simmental)		X	X

**Purebred Gelbvieh or High Percentage Balancer is 63% Gelbvieh or higher. These bulls will add muscle and red meat yield along with great maternal values.**

**Mid-Range Balancers are 38% to 63% Gelbvieh. Use these bulls to maintain feedlot performance and carcass value, without losing the maternal edge.**

**Low Percentage Balancer is 38% Gelbvieh or less. Use these bulls to add carcass value and calving ease.**

## PAP Risk Factor

46-49	Moderate Risk	Moderate Risk	High Risk	High Risk
≥50	Moderate Risk	High Risk	Do Not Use	Do Not Use

### Care of your yearling bulls:

We would encourage you to take a little extra special care of your investment(s). Yearling bulls are still growing and we all expect a lot out of them. Limit the breeding season and number of cows that they will have to service. Do not turn young bulls out in the same pasture with mature bulls. A yearling in good condition can be expected to service 15-25 cows in his first season, but he will need to be brought in early and given a little extra care after all that work. Yearlings will start losing their teeth at 15 to 18 months of age and need a little **TLC** if you expect them to grow and develop to their full potential. A little extra care up front will make your purchases last a lot longer and also make for healthier, better bulls down the trail!

When you first turn your bulls out, watch them and make sure that they are getting the job at hand done. Also, if they start getting a little run down rest them or give them a little extra energy, it will pay dividends in the long run!

### Herd Health Program:
